

Mityvac fluid evacuator range

Manual tools to handle fluids for engine, clutch and brake system

Mityvac manual tools to handle fluids for automotive engine, clutch, brake system and many other applications.

Mityvac is an American brand of automotive diagnostic, service and repair tools since 1971 that belongs to SKF Group. Beginning with the design and patent of a single hand-held vacuum pump for automotive diagnostics and service as well as industrial and consumer applications.

Mityvac offers products and systems you need for any brake and clutch bleeding application, air induction cleaning and compression testing, cooling system evacuation or refill application, for fluid handling and diagnostic applications.

We are launching in Europe this range of 4 Mityvac manual tools to evacuate or dispense fluids for engine, clutch and brake system, that fit well to the SKF European kit assortment.

- Robust, Reliable & Safe
- Easy to handle & use, just click and pump
