

Scotseal® X-Treme HD

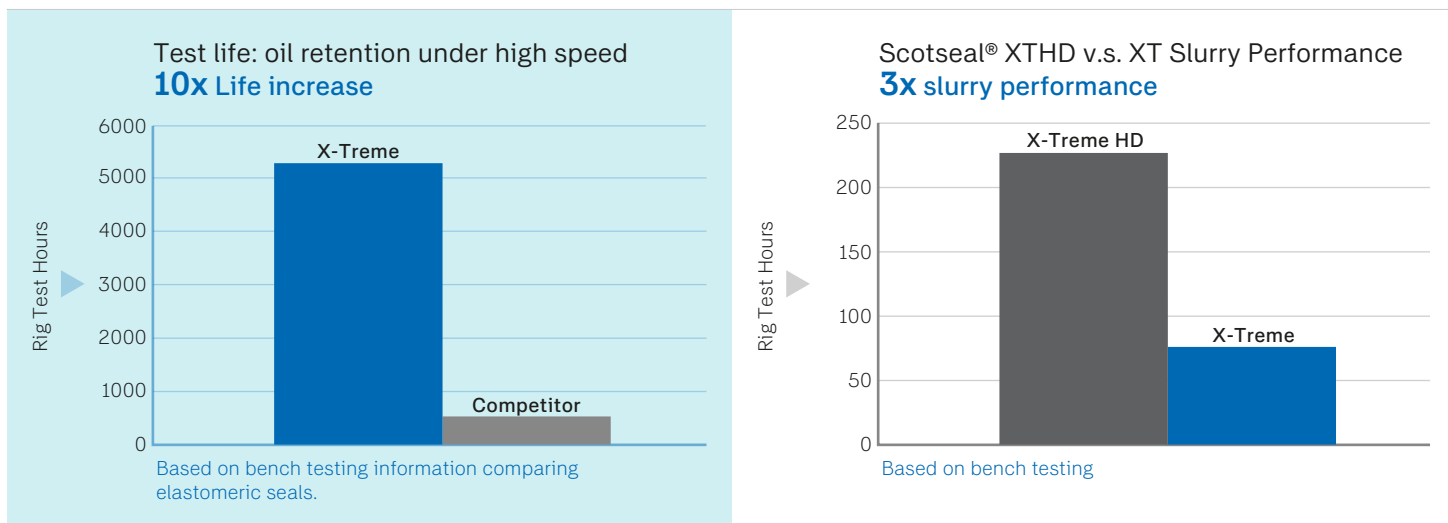

Designed for vocational commercial vehicles

Scotseal® X-Treme HD

SKF expands its Scotseal® X-Treme family with the launch of Scotseal® X-Treme HD, designed specifically for vocational commercial vehicles.

This innovation builds on the success of the original Scotseal® X-Treme, which earned SKF the prestigious **Automotive News PACE Award** in 2018 for breakthrough technology and performance.

Superior protection and efficiency

Proven oil retention, durability and performance

The Scotseal® X-Treme HD features the patented primary oil lip design used in millions of X-Treme seals in operation today. Customer benefits of this feature are enhanced oil retention capability, heat resistance, low wear, and high durability with its advanced HNBRX material and exclusive **SKF WAVE sealing lip technology**.

Outstanding contamination exclusion

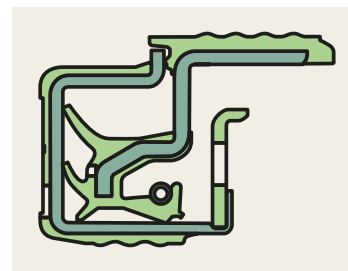

With optimized, multiple dirt exclusion lips, a wrap-around sleeve and a patented labyrinth design, it significantly reduces dirt and slurry ingress. Its corrosion-resistant design enhances **longevity in adverse conditions**.

Secure positioning and leak prevention

Featuring a special EPDM polymer on the inner diameter, it ensures an easy installation and a tight lock on the spindle, eliminating leak paths and securing the seal in place for **reliable performance**.

Easy, no special tool installation and single-piece design

The seal's design simplifies wheel end service, saving time and cost. It combines a sleeve and metal unitizer ring into a self-contained unit for **easy, damage-free installation**.
